AREA	BAD PRACTICE	# OF OCCURRENCES	EXIST BUT HAVE NO IMPACT	EXISTS AND IMPACTS LIGHTLY	EXISTS AND IMPACTS STRONGLY
REP	Feature branches are used instead of feature toggles	7	~28,57%	~42,85%	~14,28%
REP	Divergent Branches	7		~42,85%	~57,14%
CUL	Developers do not have a complete control of the environment	7	~42,85%	~42,85%	~14,28%
BPO	Failures notifications are only sent to teams/developers that explicitly subscribed	6	~33,33%	~33,33%	~33,33%
QA	Missing tests on feature branches	6		~33,33%	~66,66%
BPO	Some pipeline's tasks are started manually	5	80,00%	20,00%	
QA	Lack of testing in a production-like environment	5		40,00%	60,00%
REP	Test cases are not organized in folders based on their purposes	4	25,00%	50,00%	25,00%
INF	The CI server hardware is used for different purposes other than running the CI framework	4	25,00%	75,00%	
INF	External tools are used with their default configurations	4	50,00%	25,00%	25,00%
BPO	A build fails because of some flakiness in the execution, whereas it should not	4	25,00%	75,00%	
BM	Lengthy build scripts	4	75,00%	25,00%	
QA	Quality gates are defined without developers considering only what dictated by the customer	4	25,00%	50,00%	25,00%
CUL	Developers and operators are kept as separate roles	4		75,00%	25,00%
REP	Number of branches do not fit the project needs/characteristics	3	~33,33%	~33,33%	~33,33%
INF	A task is implemented using an unsuitable tool/plugin	3		~66,66%	~33,33%
BPO	Some tasks are executed without clearly reporting their results in the build output	3		100,00%	
BPO	Build reports contain verbose, irrelevant information	3	~33,33%	~33,33%	~33,33%
BM	Environment variables are not used at all	3	~33,33%		~66,66%
BM	Build configurations are cloned in the different environments	3	100,00%		
BM	Missing smoke test, set of tests to verify the testability of the build	3		~66,66%	~33,33%
QA	Unnecessary static analysis checks are included in the build process	3		~66,66%	~33,33%
DP	Missing rollback strategy	3		100,00%	
CUL	Changes are pulled before fixing a previous build failure	3		~66,66%	~33,33%
CUL	Team meeting/discussion is performed just before pushing on the master branch	3		~66,66%	~33,33%
REP	Project decomposition in the repository does not follow modularization principles	2	50,00%		50,00%
REP	Generated artifacts are versioned, while they should not	2			100,00%
BPO	Only the last commit is built, aborting obsolete and queued builds	2	50,00%		50,00%
BPO	Private builds are not used	2	50,00%	50,00%	
BPO	A build is succeeded when a task is failed or an error is thrown	2	50,00%		50,00%
BPO	Including unneeded dependencies	2	100,00%		
BPO	Missing notification mechanism	2		50,00%	50,00%
BPO	Unnecessary re-build steps are performed	2	100,00%		
BM	Absolute/machine-dependent paths are used	2		50,00%	50,00%
BM	Build scripts are highly dependent upon the IDE	2	50,00%		50,00%
BM	Missing/Poor strict naming convention for build jobs	2	50,00%	50,00%	
QA	Code coverage tools are run only while performing testing different from unit and integration	2		50,00%	50,00%
QA	Coverage thresholds are too high	2	50,00%	50,00%	
QA	Production resources are used for testing purposes	2			100,00%
QA	Use quality gates in order to monitor the activity of specific developers	2		50,00%	50,00%
DP	Artifacts locally generated are deployed	2	50,00%		50,00%
DP	Release tag strategy is missing	2		50,00%	50,00%
CUL	Build failures are not fixed immediately giving priority to other changes	2	100,00%		
REP	Local and remote workspace are not aligned	1		100,00%	
REP	Blobs are unnecessarily checked-in at every build instead of being cached	1	100,00%		
INF	Resources related to the same pipeline stage are distributed over several servers	1		100,00%	
INF	Different releases of tools/plugins versions are installed on the same server	1	100,00%		
INF	Different plugins are used to perform the same task in the same build process	1	100,00%		
BPO	Inappropriate build environment clean-up strategy	1		100,00%	
BPO	Missing Package Management	1			100,00%

AREA	BAD PRACTICE	# OF OCCURRENCES	EXIST BUT HAVE NO IMPACT	EXISTS AND IMPACTS LIGHTLY	EXISTS AND IMPACTS STRONGLY
BPO	Wide and incohesive build jobs are used	1		100,00%	
BPO	Monolithic builds are used in the pipeline	1			
BPO	Build steps are not properly ordered	1			100,00%
BPO	Pipeline steps/stages are skipped arbitrarily	1		100,00%	
BPO	Poor build triggering strategy	1	100,00%		
BPO	Dependency management is not used	1			100,00%
BPO	The output of different build tasks are mixed in the build output	1		100,00%	
BPO	Unneeded tasks are scheduled in the build process	1	100,00%		
BPO	Build time for the commit stage overcomes the 10-minutes rule	1		100,00%	
BPO	Authentication data is hardcoded (in clear) under VCS	1		100,00%	
QA	All permutations of feature toggles are tested	1			100,00%
QA	Testing is not fully automated leading to a non-reproducible build	1		50,00%	50,00%
DP	Missing artifacts repository	1			100,00%
DP	Missing check for deliverables	1		100,00%	
CUL	Issue notifications are ignored	1			100,00%
REP	A stable release branch is missing	0			
REP	Pipeline related resources are not versioned	0			
INF	Use shell scripts for a task for which there is a suitable plugin available	0			
BPO	Independent build jobs are not executed in parallel	0			
BPO	Tasks are not properly distributed among different build stages	0			
BPO	Incremental builds are used while never building the whole project from scratch	0			
BPO	Use of nightly builds	0			
BPO	Inactive projects are being polled	0			
BPO	Time-out is not properly configured	0			
BM	Build jobs are not parameterized	0			
QA	Coverage thresholds are fixed on what reached in previous builds	0			
QA	Test suite contains flaky tests	0			
QA	Bad choice on the subset of test cases to run on the CI server	0			
QA	Failed tests are re-executed in the same build	0
